CARVER C7 SURFSKATE TRUCK SET 6.5" COAL SATIN BLACK

This painted collection of truck C7 CARVER also features hollow axles and pivots, making this generation of Carver surfskate trucks the lightest and strongest to date.

And we have introduced the new Spring Locknut, a custom spring nut with a nylon locking ring so that no matter how hard you pump, your tension setting remains stable.

It's the truck that started it all. It's still the surf truck that turns the smoothest and pumps the fastest, it's at the forefront of true surfskate performance.

The patented second axle of this front truck not only increases the radius of your carve, but allows you to break the nose and pivot your turns on the tail. This dynamic creates thrust and propels you forward at an increasing speed.

The striking similarity to surf performance has made the C7 the choice of pros and amateurs for surf training.

Includes:

- 1x 6.5" C7 front truck
- 1x 6.5" C2 rear truck
- 2x C7 + 2X C2 Risers
- 8x mounting screws
