Embossed channels run through the tail of the new Black Tip, featuring our new Durafusion laminate. This high density, impervious thermoplastic layer is fused to the bottom the board to enhance strength and durability, provide responsive rebound and extend deck life. Pressed into our new Hyperspoon mold design, it features a deeper spoon-shaped concave in the nose and a steeper tail so you feel fully locked into your stance. The winged rails and coarse deck pad give extra grip to your heel and toe, inciting you to drive even more power through your back foot. The black-tipped fin of this shark is the last thing you see as rows of teeth take a bite out of the pavement!
