CHANNEL ISLAND AL MERRICK GUDAUSKAS TWIN 2 + 1 SINGLE TAB

Meet our most radical twin-plus-trailer fin set to date—a rakey, performance orientated template that offers the freedom of a twin but the reliability of a thruster. The Merrick/ Gudauskas 2 + 1 was created by utilizing the front curve of the BMT but we shaped in a narrower base with a sleek trailing curve and a high-performance tip to deliver next-level drive and control through turns. The result of this fun collaboration between Britt Merrick and the Gudauskas brothers (Dane, Pat, Tanner) happened while they were working on the G-Skate model, but a good fin is a good fin, and we have since learned the MGT translates very well to any board twin-fin design where a trailer is needed. This 2+1 set's foil and template generates a lot of speed and stability through turns so you can boost or slice with total confidence.
