CI AL MERRICK DUMPSTER DIVER 2 FUTURES

The idea came when riding the original Dumpster Diver while filming "Out of the Rafters" and tripping out how tiny and short the Dumpster Diver felt and wanting to build a longer - modernized version. - Dane Reynolds

The DD2 has a wider nose and tail, more nose and tail rocker, and a more subtle single concave. These updates, among other tweaks, allow the board to excel in a wider range of conditions and let you rip as hard as you think you do!
