€ 859,00

CI AL MERRICK M23 SURFBOARD FCSII WHITE

6'10" x 21 x 2 3/4 - 43.3 Lt

The M23 comes from the storied M13 bloodlines, a favorite hybrid board Al Merrick made for himself and rode variants of for decades from fun Rincon to maxing Sunset. A true high performance hybrid that caters to the widest possible type and size of surfer and for the widest range of wave conditions. Not to be confused with the CI Mid, the M23 carries more foam, boasting a fuller rail and sleeker nose outline. It paddles like a champ while still riding more like a shortboard.

Our M23 hybrid design paddles like a big board but rides like a shortboard. The M23 has a sleek nose outline and more entry rocker than your typical midlength design. It also paddles easy but doesn't hinder your ability to do your best turns in the pocket. Available stock as a round pin, and the most common sizes run from 6'8" to 7'10".

FCSII thruster setup
STD/SO, 6+4/4 glass job
FINS NOT INCLUDED
