USAGE TIPS

To ensure maximum protection with the 2 in 1 Combo Stick SPF 50 Cream and SPF 50+ Stick, make sure to shake the tube well before use. Thanks to its two-in-one format, you can use the Sunscreen Combo Stick by applying it as a cream for the face or a stick for sensitive areas such as the tip of the nose, the cheekbones or the lips.

We recommend generous, even application before sun exposure to ensure adequate coverage of the exposed area. Make sure to rub-in well to avoid white streaks. Don't forget to re-apply frequently to stay protected.

Thanks to the hole in the end of the tube, on the seam, you can attach it to your neck via a string or chord for use in the mountains or in the water.
