FCS II ALBUM KEEL TWIN FIN SET

The Album keel narrows the gap between a traditional keel template and a more contemporary twin template. The appearance is indicative of a regular performance fin with added width at the base and through the middle, and significantly more curve on the trailing edge compared to older style keels.

The high sweep angle maintains a moderate amount of hold and drive, while the tapered tip and low profile eliminate any 'tracking' feel that is sometimes associated with higher area keels.

Positioned in the small-medium size category, this is a keel designed for high-performance surfing with an emphasis on speed and performing smooth, yet radical turns on modern-style keel twin models.

Lighter surfers and females will find this keel more manoeuvrable and easy to dominate when performing turns. Those investing in one of Matt Parker's Album keel twins will also benefit from a keel that's designed to unlock all the board has to offer.

Semi-Keel

High sweep, low profile

Board Types

Designed to fit the FCS II Fin System.

Recommended for all board types including fish, funboard and twin fin boards.

Fin family:

Carver: Find Power. Powerful, drawn-out turns with added hold.

Small - Medium
