FCS II DEUS POWER TWIN + 1 PG FINS

Overview

Suited to most modern twin models, the Power Twin has proven to be one of the most popular and versatile twin templates of the past decade. It can be used as a straight twin with a stabiliser, or in an asymmetrical set up. Moderate sweep (rake), full tip and the longer base delivers incredible drive and speed with a real reliable feel when driving through your turns. Fast, loose yet dependable when you put the pressure on, this is the ultimate twin template.

Highest area twin set in the FCS range; as a result, can be pushed harder through turns. Moderate sweep (rake), full tip and longer base delivers incredible drive and speed. Lower depth value maintains manoeuvrability and looseness off the top and through turns. Designed in collaboration with Harley Ingleby for use on his asymmetric twin model. Twin fin + stabiliser

Board Types

Designed to fit the FCS II Fin System.
Recommended for all board types including fish, funboard and twin fin boards.

Performance Glass

Performance Glass (PG) fins are machine cut from layers of solid fiberglass. These fins are stiff, and are widely used by pro level surfers because the integrity of the flex is maintained under immense force, and in the most extreme of conditions and situations.
