### FCS II JS TRI FINS

The FCS II JS fin was designed by world renowned shaper Jason Stevenson (JS Surfboards), and delivers a smooth ride with an emphasis on flow and drive.

"What I like about this fin is just the speed and flow that it has, then if you want to push it a little harder it has the release too. To put it simply, it's just really reliable". Jason Stevenson

### Ideal Conditions

Open face, down-the-line waves, particularly good in point and reef breaks.

### Board Types

Designed to fit the FCS II Fin System.

Performance boards with deep concaves and moderate-to-extreme rocker.

### Fin Family

Carver: Find Power. Powerful, drawn-out turns with added hold.

### Performance Core

Performance Core (PC) fins are made using a multi-layered resin transfer molding process. The flex pattern in PC fins extends progressively from the base through to the tip, helping the surfer to maintain drive and hold through a turn. This versatile fin material is light, and can be used in a variety of different conditions.
