FCS II MID SINGLE 6.5" FIN PG PINNA LONGBOARD CLEAR

The Mid Single 6.5" and 7" have been designed to work across a variety of midlength models with a 2 + single box setup. Both sizes share the same template.

The template has a very balanced outline with moderate area through the tip and a neutral sweet angle that offers a very consistent, smooth feeling.

With an emphasis on glide, the Mid Single has been made from our solid Performance Glass material to suit this category. The foil is engineered to have a semi-stiff tip flex to assist with drawing clean, flowing lines on longer midlength boards.

Designed for mid-lengths and hybrids

Performance Glass

Performance Glass (PG) fins are machine cut from layers of solid fibreglass. These fins are stiff and are widely used by pro-level surfers because the integrity of the flex is maintained under immense force, and in the most extreme of conditions and situations.
