FCS II PERFORMER KEEL TWIN FIN SET

This full-bodied template was designed to suit a range of traditional wide-tail fish models and is the highest area FCS II keel in the range.

The Performer Keel has a neutral sweep angle, full tip and flowing curves that are synonymous with the performer family of fins. Predictable in nature with a turbo boost of drive and forward acceleration, this versatile keel is suited to heavier and more powerful surfers.

The key features of the Performer Keel are stability, speed and control, with a hearty dose of drive and flow.

With maximum drive and flow on offer, the Performer Keel will have you soaring down the line, even in the softest of waves. When the section pops up you'll be able to jam a nice turn or carve with confidence and control.

Highest area keel in the range
Traditional twin fish models
Drive + control

Board Types

Designed to fit the FCS II Fin System.
Recommended for all board types including fish, funboard and twin fin boards.

Performance Glass

Performance Glass (PG) fins are machine-cut from layers of solid fibreglass. These fins are stiff and are widely used by pro-level surfers because the integrity of the flex is maintained under immense force, and in the most extreme of conditions and situations.
