FCS II PERFORMER TWIN + 1 FIN SET SMALL MEDIUM

Bridging the gap between a twin and a thruster, this versatile set is adaptable across multiple board models and surf conditions. [Overview](#)

It's best to think of the Performer Twin as 2/3 Twin and 1/3 Thruster. The side fins are at the lower end of the S-M size category and have a neutral sweep angle (Performer Family) and a streamlined outline from base to tip. The stabiliser, which has a higher sweep angle (Carver Family), is oversized compared to most stabiliser fins which increases the combined surface area of the set, but more importantly, adds significant control when surfing.

Adaptable across super twin models, hybrids and performance shapes, the Performer Twin offers the foundations of the thruster (predictability & control) with the looseness and tail release that's closer to the feel of a twin.

- Twin feel, thruster performance
- Suited to modern twin and hybrid models
- Smaller side template, larger stabiliser

Board Types

Designed to fit the FCS II Fin System.
Recommended for all board types including fish, funboard and twin fin boards.

Performance Glass

Performance Glass (PG) fins are machine cut from layers of solid fibreglass. These fins are stiff and are widely used by pro-level surfers because the integrity of the flex is maintained under immense force, and in the most extreme of conditions and situations.
