FUTURES FINS CONTROLLER QUAD BAMBOO

The Controller Quad is a split keel setup designed specifically for use in wide tail fish designs. The honeycomb & bamboo construction, V2-Foil and xtra-large surface area are great for generating speed and maintaining it through a sequence of turns. With the upright template of the quad rears, there is a skatey feel to the set that's similar to a twin keel, but with more control.

Template Category | Pivot (tight turns, quick, loose)
