### FIREWIRE FLAT EARTH SURFBOARDS FCS FINS

These are crazy times! When conspiracies become realities, and creativity manifests to functionality.

Introducing the Flat Earth: a board built to shred ankle high to overhead surf. Designed by Akila Aipa and dialed-in by Kelly Slater, this model is ready to be your go-to board whatever the conditions of the day.

Finesse and flow in waves chest to head high, sized at your normal shortboard volume or a couple liters more. Experiment with a twin + trailer or twin without trailer, because this shape surfs on a spectrum from loose and slidey in smaller sizes with two twin fins, to grippy and drivey in larger sizes with a trailer added.

In summary, let the Flat Earth blow your mind as a twin fin, or sip the serum in doses with a trailer fin. Feel the speed.

Hit the lip.

Bury the rail.

As Akila's dad – the great, surfer-shaper Ben Aipa – would say, "HOOK IT!"

VISIT [www.flatearth surf](http://www.flatearth surf) to join the conspiracy of truth and science which could lead you to winning a "Flat Earth".
