€ 49,00 ~~€ 54,60~~ - 10%

FIREWIRE FRONT FOOT 4 PIECE TRACTION PAD

Inspired by surfers like Kevin Schulz, Timmy Reyes and others for whom mid-air grip is a must, the Firewire Front Foot traction pad is designed to hold tightly to your front foot in a variety of maneuvers, whether you're an aerialist or weekend warrior.

Cut from our most sensitive rectangle tread, the Firewire Front Foot pad is far thinner than most front foot traction pads because we wanted it to feel most familiar to surfers stepping off wax for the first time, while still offering increased grip and traction above what wax provides.

The best part? No potential for melting in heat or messing up your car.

The Firewire Front Foot Pad is cut to suit the front foot position of any surfboard shape, whether performance, groveler or otherwise.

2.5mm thick

Rectangle tread

3M adhesive backing
