FIREWIRE SCI-FI 2.0 TOMO LFT FUTURES FINS

The update to one of the most popular designs in surfing has arrived.

Scifi 2.0 features a wide point forward of center which allows the design to be ridden 1" shorter than its predecessor with more volume packed into shorter length, it also has a more pulled in tail and rocker similar to the Cy-matic, giving the design greater range than the original while still maintaining good small wave prowess.
