FUTURES F2 THERMOTECH QUAD FIN XSMALL

These fins are balanced templates that are designed to work for all surfers in all conditions.

The solid base directly transfers power, while the tip is still flexible and resilient allowing it to bend and load up. The White Composite (Thermotech) fins have a consistent flex that hold great on the bottom, and then release through turns. If you're looking for that 'glass on' look, with a higher performance feel than other composites, then you have to try the F series from Futures.
