

FUTURES FINS 3/2 VECTOR ALPHA THRUSTER CARBON GOLD MEDIUM

Code: 1402-345-00

€ 89,95

FUTURES PINNE 3/2 VECTOR ALPHA THRUSTER CARBON GOLD MEDIUM

WHAT IS A VECTOR FOIL

It is a proprietary Futures foil with a concave surface on the inside of the front fins, increasing surface area, water attachment, and lift.

WHAT IS A 3/2

3/2 complements the Vector with an extra 3 degrees of cant and 2 degrees of toe, introducing a twist to the foil for improved planing angles in sharp turns, creating lift and hold deeper into the maneuver.

PERFORMANCE BENEFITS OF THE VECTOR 3/2

The Vector 3/2 is a Speed Generating fin, maximizing water attachment over multiple planing surfaces, resulting in lift and reduced drag. The concave surface and twist in the upper half provide a unique grip and projection sensation, delivering fluid speed generation in smaller waves and powerful connection and increased speed in larger surf, resulting in faster and improved turns. Helps connect turns while generating and maintaining speed with a more predictable engaged feel.

BENEFITS OF THE SCIMITAR TIP

Originally developed in 2006, The Scimitar Tip is flattened edge at the fin's trailing end, tightens the turn arc by reducing the template's length. This complements the 3/2 foil's lift and speed design, enhancing the feeling of release from turns while maximizing the foil properties throughout the fin's template.

Template Category - Neutral (all-around | versatile)

Construction - Alpha

Speed Generating

Suggested Wave Type - All types | All conditions

Size - Medium (125 – 175 lbs)
