

FUTURES FINS T1 TWIN ALPHA SEIRES CARBON

Code: 1008-321-00

€ 78,00

THE FIRST SURF FINS MADE FROM RECYCLED FISHING NETS.

Made in California, the Alpha product line is now made by incorporating Bureo's NetPlus recycled fishing nets with Futures' compound 6 Carbon and Air infused technology. NetPlus material is sourced from Bureo's fishing net recycling program in Chile, which provides collection points to keep plastic fishing nets out of our oceans. Preventing harmful materials from entering the ocean, their program protects wildlife and supports local fishing communities through financial incentives.

Our Alpha product line is molded carbon fiber made in Huntington Beach, California that delivers every bit of performance you'd expect from an upgrade fin at a Balanced Ride Number. Incredibly lightweight & resilient, Alpha is the first of its kind; created using one-of-a-kind materials and new technologies developed by Futures.

The T1 Alpha is Future's performance twin-fin designed for surfing in the pocket, as well as smooth rail-to-rail transitions that modern twin-fin surfing is known for. The T1 Alpha's carbonized flex pattern and flat foil combine for a super lively feel, helping to generate maximum drive in softer conditions. The set is equipped with the option to ride with a small trailer fin for increased stability creating more of a thruster feel. All Alpha products are designed and manufactured exclusively in Huntington Beach, Ca USA.
