

FUTURES V2 Q1 FINS THERMOTECH QUAD WHITE

Code: 3008-304-47

€ 59,00

The V2Q1 Thermotech Quad is Future's quad set designed for all-around use in small to medium size waves. Featuring the V2-Foil on the front fins, there is more speed generating capability with this set, as compared to a flat foil. Made in Huntington Beach, the Thermotech product line does not have the traditional plastic feel of a composite fin. Instead, they have a consistent flex that creates drive and release through turns. Thermotech fins come with the Futures Truss Base, making them lighter and stronger.

Template Category | Neutral (balanced, all-around)

Construction | Thermotech

Size | Medium Quad
