ION WETSUIT ELEMENT SEMIDRY 3/2 BACK ZIP

The Element 3/2 Back Zip wetsuit for men caters to the needs of water men who don't need much to enjoy being in the ocean. Supple, stretchy and robust; the Element line includes many features from the more technical end of the range: Silk_Stuff inside lining on the upper body provides a comfortable fit and good stretch in the shoulder area. Hot_Stuff 2.0 – ION's stretchiest thermo lining – improves warmth, flexibility, and comfort even further. On top, critical seams were reinforced to make this an everlasting basic on many trips.

Hot_Stuff 2.0

Hot_Stuff 2.0 thermo lining boasts a luxuriously plush feel thanks to its larger loops that effectively trap more air, providing superior heat insulation. Among ION's lineup, it stands out as the most flexible thermo lining available.

Seam_Reinforcement

All stress points are reinforced and securely sealed from the inside using Melco tape.

Water_Gate

An internal neoprene panel seals off the back zipper, acting as a barrier to minimize the amount of water rushing into the wetsuit.

Drain_Holes

Prevents water buildup within the wetsuit. The Drain Holes are securely fixed from the inside and do not widen.

Silk_Stuff

A silky interior lining ensures a comfortable feel against bare skin. Despite its cozy appearance, it proves to be incredibly durable with its superb flexibility.

Sunglasses_Loop

A small webbing loop on the neck of wetsuits and tops to attach the safety line of watersport sunglasses.

Glued Blind Stitch

Glued and blind-stitched seams are crafted by first applying adhesive, followed by stitching with a curved needle halfway through the neoprene to ensure water resistance.

80% Neopren 20% Nylon
