€ 899,99

LIB-TECH LOST HYDRA 5'11" SHORTBOARD 5 FIN

"The Hydra is the most advanced small wave board I have ever created! It melds more than 25 years of small wave fish and mini wave hybrids. Built around an overall low rocker paired to an almost traditional "fish" outline featuring a "locked in" snowboard influenced sidecut outline, speedy forgiving double concave chined "Hydra-hull", a rail shortening bite increasing split diamond tail and a flat-ish deck with forgiving rails adds flexibility and allows radical surfing with wide tails." - Matt Biolos

5'11" X 22.25" X 2.8" L 43.5

TECHNOLOGICALLY TOUGHER - ENVIRONMENTALLY NICER!

Lib Tech is dedicated to board riding and hands on high tech board building. We have spent a lifetime of surfing, shaping and working with alternative, high performance, environmentally friendly materials and constructions. Traditional surfboard construction has always felt too fragile and the build process is toxic and unhealthy for the planet and craftspeople. We know there had to be a way...

THE EVOLUTION OF ECOIMPACTO

Mike Olson and our hands on craftsperson crew are constantly experimenting and working to improve our process and materials. The latest incarnation of our original ecoIMPACTO construction incorporates a new improved formula of our foam and refinements to our process that reduce weight and improve performance while retaining that "Dang Difficult to Ding" durability that relaxes your lifestyle, makes Lib Techs the best travel boards in the world and hold their value over time.
