MBB MOPED RACKS

Not everyone gets to live a short bike ride from their break. If you have to cover some more ground, or just love zipping around on your moped or scooter, our Moped Racks are for you. We've adapted our same quick release bars with some unique mounting hardware specially adapted to work with tubular cargo racks common to moped and scooters. This also makes them an ideal match for moped style electric bikes including RadRunners, Scramblers, and the Super 73.

MBB Moped Racks are the best racks around for carrying a board to the beach with your Moped. The racks feature our patent pending quick release bars, so you can pop the bars in when you need them, and pop them out with the push of a button when you don't. The bars mount to tubular cargo racks common on most mopeds, and because the rack bars are mounted separately they can spread out to carry long boards and SUPs on many mopeds. All aluminum and stainless construction for coastal environments, fits a wide array of mopeds and scooters and just about any surfboard. We recommend the racks for boards 7-8 feet in length when bars are mounted together, or longer boards when bars are mounted apart. Racks have been evaluated on typical mounting configurations at speeds up to 30 mph.

In addition to the Installation Video below, you can also check out the printed instructions that come with each of the racks: Moped Rack Instructions
