Bottom: Single to double concave

Ideal waves: 1-6ft

Level: Beginner – Expert

- The best selling longboard range in the world in a construction featuring key performance characteristics.
- The best in versatile longboard performance, using technically advanced construction at extremely attractive retail prices.
- Great longboard. It's an evolved shape that lends itself really well for swooping bottom turns, high trim lines and drop knee cutbacks.
- New sharper rails in the tail, modern performance rocker combined with mellow V bottom blended with a subtle double concave.
- Continuous refinements make the NSP Longboard easy to trim on the wave and dynamic when riding off the tail.

CARBON FLEX TAIL

Strategically applied to the back end of the rails, the Carbon Flex Tail provides increased durability.

[Carbon Tail patch of the Protech Longboard]

A Carbon Flex Tail is also more responsive than a conventional construction and provides unparalleled flex response in turns. Visible through a small patch on the tail, the carbon layer extends throughout the tail section of the rails.
