PUKAS CHRIS CHRISTENSON PEGASO 5'10" TWIN FIN BLACK

A more performance based twin fin when compared to the Chris Fish model, the Pukas Pegaso has a slightly more vertical approach to your surfing and handles bigger surf but still has that twin fin mentality. Out of all Chris Christenson's twin fins, this is his A team's favorite.

It can be surfed more aggressively in the pocket yet it still has good glide and drive. It's a twin fin you can take to Indo or to your local beach break since it handles surf from 1ft-5ft.

How to order the Pegaso: 3-4 inches longer than your standard fish or 3-4 inches shorter than your daily performance shortboard. An average surfer that stands at 1m80cm and 70-75kg. should go for a 5'7" or 5'8".

Fins System – Future Systems black boxes exclusively. Fins – The Captain Fin Chris Christenson Twin Especial (Future System). It's a multi-color solid fiberglass layup. Chris designed this fin to work well in your modern twin fin fish. It has an upright profile for pivot while still delivering the speed and the skatie feel that you love in a twin fin.

Dimensions

5'10" 19 1/2 2 9/16 33,89 l.
