

SPONGE-REZ BODYBOARD REPAIR KIT 2FL OZ

Code: 2839274300

€ 20,00

Solarez

SPONGE-REZ BODYBOARD REPAIR KIT 2FL OZ

Great for repairing most any bodyboard material EXCEPT STYROFOAM

Extreme adhesion

Clear, strong, flexible, tough, abrasion-resistant

Seals leash plugs, fixes delaminations, abraded surfaces, broken seams

Self-leveling, cures glossy in 20 minutes, usable in 2 hours

Best if left to cure overnight

Little bit goes a long way

Sponge-Rez is a tough, clear, flexible resin formulated to mend the most common types of catastrophes bodyboards are heir to; worn-out leash anchors, creased bottoms, delaminated decks, hulls or rails, sponge-deck (also known as rash-deck) and semi-fatal gouges. Sponge-Rez works on all types of bodyboard materials including Ethafoam, Surlyn, EVA, Vinyl, and Arcel, however it will melt styrofoam (EPS) cores. Sponge-Rez also repairs cracked, weathered swim fins. If applied to the fin blades, it increases their stiffness and thrust. General Directions:

Surface should be clean, dry, and free of dirt, and or wax.

Use in well ventilated area, preferably outdoors. DO NOT deliberately inhale vapors - don't be stupid.

Apply liberally on porous surfaces. Use spreader to force Sponge-Rez into the damaged part of the board. Do not apply Sponge-Rez with your fingers.

Sponge-Rez will "skin-over" in about 10-15 min. and feel dry in about 2 hours but a complete cure takes 24 hours - especially when filling deep gouges. This is not a UV cure product.
