T. PATTERSON 6'0" SYNTHETIC 84 FUSION HD FUTURES

The Synthetic 84 is a tribute to the good old days, when Timmy started his first surfboard label Synthetic surfboards in the 1980's. Timmy has taken all the positive aspects of boards he built then and has incorporated them into the modern shapes of today.

This combo is nothing but pure magic and has been tested by some of the top surfers from around the globe. The consensus of all that have ridden the Synthetic 84' was nothing but fantastic! As a matter of fact, the "psych meter" went through the roof! The Synthetic 84 has a lower rocker and the bottom runs flat to a slight single into a slight double and fades into vee off the tail. The deck stays flat with a down rail and beak nose.

This allows for maximum volume, yet the down rail lets you still sink this higher volume board onto rail in critical sections and off your bottom turns. It has a fuller outline so this board likes to increase your wave count and really comes in handy battling out the every day crowds. You will want to ride this model about 2 inches shorter than your everyday shortboard and comes in a tri fin set up.

DIMENSIONS

- 6'0" x 19.63" x 2.45" - 32.31L
