

WALDEN 6'10" MINI MEGA MAGIC FUSION HD FCSII

Code: WAFH-MM0610-WH1

€ 1.029,00

WALDEN MINI MEGA MAGIC 6'10" FUSION HD

The Mini Mega Magic is now available in Surftech's Fusion HD technology. The Mini Mega Magic is a mid-size version of the best selling Mega Magic. Sized between 6-7' it is a sporty version of the popular Mega Magic.

Designed for the (bigger) surfer who is looking for a bigger shortboard (rather than the Mega Magic which is a shorter longboard). The Mini Mega has more of a shortboard outline with a pulled in nose, with a lot of extra volume for maximum floatation yet it is still highly maneuverable.

The Mega Magic itself was introduced about 6 years ago and it has become one of the best selling Walden designs ever. This board is popular because it lets you go down to a shorter board regardless of your size or skill. The Mega Magic is our Magic Model with the most condensed volume. We take volume from the length and redistribute it to the width and thickness while maintaining our famous Magic Model performance. The Mega Magic has the famous Magic Model elements: our patented concave bottom, hard rails & lots of rocker. About 1/2-1" thicker and 1-2" wider than a standard Magic Model.

6'10" x 23 1/2" x 3 1/2"

67.0 ltr

***Fins Not Included

Fusion HD technology

Surftech's Fusion HD construction delivers the perfect balance of durability and lightweight performance. Whilst not bulletproof, Fusion HD offers a significant increase in durability over a regular PU board with a much improved resistance to deck compressions which can blight the look of a fibreglass board. Fusion HD uses a Fused Cell EPS Core (Dual Core) with Clear HD-Epoxy Resin and High Quality E-Glass Fibreglass. There is a full Biax Deck Patch, a UD Carbon Stringer and a single fin box with FCS II side bites. This technology results in a lively and 'springy' feel which powers the board out of turns and maintains a 'new board' feel for the surfboard's lifespan (usually significantly longer than a PU board!).

1. Fused Cell EPS Core // Closed-cell EPS core provides more response + flotation
2. Clear HD-Epoxy Resin // Epoxy resin system with high thermo-mechanical performances
3. High Quality E-Glass Fibreglass // E-glass has the highest strength-to-weight ratio available
4. Full Biax Deck Patch (45° / -45°) // The Biax fibreglass distributes power + protects from dings

5. UD Carbon Stringer or Wood Stringer // Distributes power + adds pop + adds break strength
6. FCS II or FUTURES Fin Boxes // Takes just seconds to insert and remove the fins
7. Hand-Finished // Machine-shaped, hand-laminated, and hand-finished
