### WAX FRESH SURFBOARD WAX SCRAPER

No more wax comb struggles. The new surfboard wax remover that'll blow your mind.

If you surf, then you know the struggle that is removing old wax from your surfboard.

Thanks to two surfers from Australia, Gareth and Dyl, this struggle is now virtually over.

Unlike anything before it, the Wax Fresh wax scraper is a multidirectional tool that fits comfortably in your hand. It's just nice to hold!

Due to its sharp edge running all the way around, you can move it in any direction and it will remove your wax. Up and down, long strokes or circular motions are just some of the ways to use your Wax Fresh.

#### Key Features

- Ergonomic Design
- Recycled Plastic
- 100% Recyclable
- Designed & Made in Australia
- Made By Surfers for Surfers
- Free UK Shipping

Give your board a treat by cleaning off that old wax and apply a new coat of wax for a fresh feel and stronger hold under your feet.

#### What is unique about Wax Fresh?

Wax Fresh is the first of its kind, multi-directional surfboard wax remover that fits comfortably in your hand. Having an edge around the whole bottom means you can use Wax Fresh in any direction, up/down, long passes or circular motions. You will soon find your preferred method.

What is different about Wax Fresh to other wax removal tools?

When using your Wax Fresh wax removal tool, you don't need to warm the wax on your surfboard like traditional methods. Wax Fresh can be used on cold wax and removes your wax easily. This avoids the sticky mess that previous methods would produce.

How to dewax a surfboard?

Previously you would have to warm your surfboard by either leaving it in the sun, using a hair dryer, a bin bag full of hot water, a kettle of hot water or a number of other ideas before taking whatever your preferred method of wax scraper was, credit card, ice scraper, wax comb etc. and then scrape the melted wax off your board. It was always a messy job, and everyone has wax related story, like leaving your board out in a sunny room to melt the wax only to forget about it and return hours later to find it melted all over the furniture.

With Wax Fresh you don't need to warm the wax at all. Going in any direction, your Wax Fresh Scraper will remove your wax and even gets into heel dents with minimal pressure.

How to clean your Wax Fresh Wax Scraper

When you have finished using your Wax Fresh Scraper, it will have wax residue on it. Simply place it into some warm water for a few minutes, then clean with a paper towel and it will look like new.
